

TreasureBasket Training Sessions For Parents and professionals

TreasureBaskets support all the areas of development of babies aged 5-10 months, e.g. speech and language, attachment, thinking and learning, sense of self, physical, emotional, even social as well as helping parents to observe and understand more.

Come and learn more about all the different ways in which TreasureBaskets can support the babies and parents you are working with, and to discuss issues that arise in your sessions.

Make your own TreasureBasket!

Come and pick up your basket and start collecting objects!

We will sometimes invite babies to teach us, watch (and sometimes make) a video and learn directly from the babies and what their behaviour can tell us about what they think and feel.

Each project using a TreasureBasket will also receive individual visits to discuss and help with practical questions and issues that arise.

The sessions are open sessions and will adapt to the needs of those attending.

Please contact us to discuss cost of sessions and baskets.
